UDAPEOPLE PROJECT

Features:

Automated deployments and faster delivery.

Release new features faster.

Faster release will bring more innovation within company and will make end users happy which will in turn increase revenue of the company.

Cost saving as traditional deployments where manual methods were used would need more workforce and expenses to the company.

Increases the reputation of the company.

More visibility to the leadership team as all deployments and releases happen in orchestrated fashion.

Automation will facilitate more time for innovation.

Less downtime
